

This *R Markdown* template is for writing an Oxford University thesis. The template is built using Yihui Xie's **bookdown** package, with heavy inspiration from Chester Ismay's **thesisdown** and the **OxThesis** L^AT_EX template (most recently adapted by John McManigle).

This template's sample content include illustrations of how to write a thesis in R Markdown, and largely follows the structure from this R Markdown workshop.

Congratulations for taking a step further into the lands of open, reproducible science by writing your thesis using a tool that allows you to transparently include tables and dynamically generated plots directly from the underlying data. Hip hooray!
